Tower Services Technician

Description

Climbing of communication towers to install, replace, or repair antennas or auxiliary equipment used to transmit and receive radio waves.

Responsibilities

- Building of new tower locations
- Using all assigned safety devices while climbing
- Driving to sites and occasional pulling of trailers
- Perform maintenance or repair work on existing tower equipment, using hand or power tools
- Read work orders, blueprints, plans, datasheets or site drawings to determine work to be done
- Inspect completed work to ensure all hardware is tight, antennas are level, hangers are properly fastened, proper support is in place, or adequate weather proofing has been installed
- Bolt equipment into place, using hand or power tools
- Test operation of tower transmission components, using sweep testing tools or software
- Lift equipment into position, using cranes and rigging tools or equipment, such as capstans
- Light travel, including overnights, as necessary

Qualifications

- Usage of hand and power tools
- Ability to climb 200- 500 ft heights
- Safety focused
- Knowledge and use of tools

REQUIRED EXPERIENCE AND EDUCATION

- High School diploma or equivalent
- Climbing experience a plus
- Manual labor and work in outdoor elements

WORK ENVIRONMENT

- Outdoors in all seasons.

PHYSICAL DEMANDS

- Climbing 200-500 ft heights
- Lifting, pulling, standing, walking
- Ability to lift up to 100 lbs.
