WATCH COMMUNICATIONS
Open Internet Policy
(Effective as of June 11, 2018)

WATCH Communications ("WATCH", "we," "our," or "us") is committed to an open Internet and supports the following Net Neutrality principles:

- Transparency
- NO Blocking of Internet content, subject to reasonable network management as described below
- NO Throttling of Internet content, subject to reasonable network management as described below
- NO Unreasonable Discrimination
- NO Paid Prioritization of Internet content
- Freedom of Customers to access lawful content
- Freedom of Customers to use non-harmful applications of their choice
- Freedom of Customers to attach non-harmful personal devices

This Open Internet Policy sets forth certain information regarding the policies and practices of WATCH and how we manage our networks for broadband internet access service (the “WATCH Networks”). This Open Internet Policy is a supplement to and is incorporated by reference in our Customer Service Agreement (“Service Agreement”) (available at: https://watchcomm.net/about-us/legal/customer-service-agreement/), and in the event of any inconsistency between this Open Internet Policy and the Service Agreement, this Open Internet Policy shall control.

WATCH’s broadband access service is primarily a fixed wireless service (“Service”). Generally, given the nature of fixed wireless services, certain circumstances may affect the speed and quality of the Service, including but not limited to foliage, line-of-sight obstructions, the distance between a Customer’s premises and the transmission point, as well as the Customer’s connection of multiple devices to the WATCH Networks. Although we have engineered the WATCH Networks to provide consistent high-speed data services, some network management for these scenarios is required, because very heavy data usage by even a few customers at times and places of competing network demands can affect the performance of all Customers.

I. NETWORK MANAGEMENT PRACTICES
   A. Blocking: Other than reasonable network management practices disclosed below, we do not block or otherwise prevent a Customer from lawful content.

   B. Throttling: Other than reasonable network management practices disclosed below, we do not throttle or otherwise degrade or impair access to lawful Internet traffic on the basis of content, application, service, user, or use of a non-harmful device.

   C. Affiliated Prioritization: We do not directly or indirectly favor some traffic over other traffic, including through use of techniques such as traffic shaping, prioritization, or
resource reservation, to benefit any of our affiliates, defined as an entity that controls, is controlled by, or is under common control with WATCH.

D. **Paid Prioritization:** We do not directly or indirectly favor some traffic over other traffic, including through use of techniques such as traffic shaping, prioritization, or resource reservation, in exchange for consideration, monetary or otherwise.

E. **Congestion Management:** Our Service is provided on a “best efforts” basis and our congestion management practices are in place to ensure that all Customers experience as high quality a service under varying usage periods. Our typical frequency of congestion is estimated at 2%. Customers select how much high-speed data they receive under a designated Service plan; the specific Service plan is set forth in the COS. If a Customer exceeds his/her/its selected high-speed allotment during a service cycle, we may reduce the Customer’s data speed for the remainder of that service cycle. We do not impose any additional usage limits for the Service. In a manner consistent with our Service Agreement and Privacy Policy, we may monitor network traffic to ensure capacity is sufficient to maintain an efficient network load, to perform diagnostics and to otherwise manage and enhance the WATCH Network. To help manage traffic on the WATCH Network, during times of high demand, we may allocate available bandwidth among Customers on an equal basis, by account level. In addition, we may prioritize certain applications, such as public safety and voice, over other traffic types.

   i. We may also conduct deep packet inspection (“DPI”), which is a type of filtering that will examine the data and/or header part of Internet traffic for viruses, spam, intrusions, or protocol non-compliance that may harm the WATCH Networks; to determine the routing of Internet traffic; for internal statistical and performance purposes; for lawful intercept capabilities, and/or enforcement of our Service Agreement. We do not use DPI to conduct data mining for targeted marketing or advertising, or anti-competitive purposes.

   ii. If we determine, in our sole and reasonable discretion, that the manner in which a Customer is using the Service negatively impacts other Customers or the WATCH Networks, we reserve the right to apply additional congestion management techniques.

F. **Application-Specific Behavior:** Subject to the qualification that WATCH may reasonably limit or rate-control specific or classes of applications, or other specific protocols or protocol ports as set forth below, WATCH generally treats all lawful applications identically. However, we reserve the right to block or limit access to any applications, ports or protocols that we determine, in our sole and reasonable discretion, may expose the WATCH Networks to potential legal liability, harm the WATCH Networks or otherwise interfere with or impair the experience of other Customers on the WATCH Networks. The WATCH Networks may also not support certain high-bandwidth video and voice applications, or peer-to-peer applications that carry unlawful or harmful content/software.
G. **Device Attachment Rules:** Generally, you do not need approval to connect a third-party device to the WATCH Networks. WATCH does not limit the types of devices that can be connected to the WATCH Networks, provided they are used for lawful purposes and do not harm the WATCH Networks, violate our Service Agreement, or harm other users of the WATCH Networks. However, if we determine, in our sole and reasonable discretion, that the connection of a particular type of device to the WATCH Networks negatively impacts other users or the WATCH Networks, or may expose us to potential legal liability, we reserve the right to limit or restrict Customers’ ability to connect such type of device to the WATCH Networks. If you need technical support services to assist you in the installation and configuration of third-party devices, please contact us or visit [https://watchcomm.net/support/](https://watchcomm.net/support/). Depending on your level of Service, there may be an additional monthly fee for IT support services.

H. **Security:** We have taken reasonable physical, technical, and administrative safeguards to protect the integrity and operations of the WATCH Networks. For certain residential Customers where we own the equipment, we block certain ports to protect web interfaces. We monitor the WATCH Networks for security threats and may prohibit certain activity on the WATCH Networks that we may deem, in our sole and reasonable discretion, poses a potential risk to the WATCH Networks or to other Customers. Triggering conditions include but are not limited to denial of service activity, IP address or port scanning, excessive account login failures; or certain Internet addresses that are disruptive, malicious and typically persistent. If we notice excessive Customer connections, including but not limited to Wi-Fi connections, that are harmful or are commonly used to disrupt the normal use of the WATCH Networks or use by other Customers, we will attempt to notify the Customer to work collaboratively to remedy the issue to the extent possible; however, we reserve the right as a reasonable security practice, without advance notice, to block any Customer traffic, ports, protocols, devices, or applications (such as peer-to-peer applications that may carry malicious software or are known to be problematic) that we determine, in our sole and reasonable discretion, may cause harm to the WATCH Networks or to other Customers, or may expose us to potential legal liability.

II. **PERFORMANCE CHARACTERISTICS AND COMMERCIAL TERMS**

Specific Service fees and rates for an individual Customer are available through the WATCH Website.

A. **Service Description and Pricing:** Links to a current description of the categories of Internet access service offered to residential and business Customers are available here, including pricing, expected and actual access speed and latency, and the suitability of the service for real-time applications:

**RESIDENTIAL:** [https://watchcomm.net/residential/](https://watchcomm.net/residential/)

**BUSINESS:** [https://watchcomm.net/business/](https://watchcomm.net/business/)
Additional information on pricing and Services can be obtained by calling 866-586-1518.

B. Impact of Non-Broadband Internet Access Service Data Services (also known as “Specialized Services”): We do not offer data-related Specialized Services to Customers that will affect the last-mile capacity available for, and the performance of, our broadband Internet access Service offering. However, there may be a temporary slowing of Internet speed when using any of WATCH’s broadband and VoIP services at the same time.

C. Various Fees. We will assess the following fees for our Service, where applicable. Please see our Service Agreements for pricing details.
   i. Security Deposit: Varies depending on Credit Check
   ii. Installation Fee: Standard Install $149.99, additional fees may occur for custom installs
   iii. Transfer of Account Ownership Change: $35.00 one-time fee
   iv. Equipment Rental/Lease Fee: $0.00
   v. Equipment Purchase Fee: $0.00
   vi. Equipment Repair/Replacement Fee: $0.00
   vii. Late Fee: 5% of balance or minimum of $5.00 per month
   viii. Cancellation Fee: $0.00 requires 30 day notice
   ix. Early Termination Fee: Customer billed out to end of their service month
   x. Reconnection Fee for Terminated Service Due to Non-Payment: $29.00
   xi. Collections Customer Returning to Service: Fees based on collection amount.
   xii. Service Change Fee: $0.00 with Equipment Maintenance Plan (EMP)
   xiii. ACH Overdrawn Check Fee: $30.00
   xiv. US Postal/Paper Bill Fee: $2.50
   xv. CAN-SPAM Damage Resolution Fees: Varies depending on damage
   xvi. Relocation Fee: $0.00 with Equipment Maintenance Fee (EMP); $75.00 without EMP
   xvii. Point-to-Point Fees: One time $99 installation fee and $9.00 monthly service

D. Fees for Additional Services: A current description of the fees for additional network-related services can be found at the links below:
   i. Colocation: details available at www.corpsite.com
   ii. Web Hosting: details available at www.corpsite.com
   iii. WiFi: Depends on Customer needs, link www.watchcomm.net
   iv. MSP Services: Depends on Customer’s needs, link www.watchcomm.net.

E. Network Speeds: WATCH offers a standard range of download speeds to residential Subscribers varying from 1 Mbps to 25 Mbps, to small business/home office Subscribers ranging from 3 Mbps to 25 Mbps, and to commercial Customers up to 1 Gbps. The WATCH Networks are designed to support these speeds to help ensure that every Customer receives the speeds to which they have subscribed. WATCH, however, cannot guarantee speeds at all times, as there are many factors and conditions beyond WATCH’s control that can affect Internet performance. Some of these external factors and conditions are:
i. Performance of Subscriber computer and/or router
ii. Type of connection to Subscriber’s own equipment (i.e., Wi-Fi)
iii. Congestion of websites and services on Internet
iv. Website or service limiting speeds on the Internet
v. Internet and equipment performance outside of the WATCH Networks
vi. Weather conditions

The WATCH Services are advertised as “up to” certain speeds reflecting performance under ideal conditions. Without purchasing an expensive “dedicated” Internet connection, no Internet Service Provider can guarantee package speeds at all times.

F. Acceptable Use: As set forth in the Service Agreements, all of WATCH’s service offerings are subject to the WATCH Acceptable Use Policy (“AUP”), which we may from time to time establish or revise. The AUP is available here: https://watchcomm.net/about-us/legal/acceptable-use-policy/.

H. Redress Options: WATCH endeavors to respond to all Customer concerns and complaints in a timely and fair manner. We encourage Customers to contact us at 800-589-3837, or complaint@watchcomm.net, or U.S. postal mail to discuss any complaints or concerns as they arise. Our postal address is 3225 W Elm Street, Lima, OH 45805.

III. FCC REQUIREMENTS AND COMPLAINT PROCESS

The Federal Communications Commission (“FCC”) has adopted rules to preserve the Internet as an open platform (“Rules”). Information regarding these Rules is available on the FCC’s website at: https://www.fcc.gov/restoring-internet-freedom

If a Customer believes that we are not in compliance with the FCC’s rules, the Customer may file an informal complaint with the FCC. The FCC urges Customers to submit any complaints via its website at the following address: https://consumercomplaints.fcc.gov/hc/en-us.

IV. ADDITIONAL DISCLAIMERS

This Open Internet Policy does not affect, alter or otherwise supersede the legal status of cooperative efforts by WATCH that are designed to curtail copyright or trademark infringement in response to information provided by rights holders in a manner that is timely, effective, and accommodates the legitimate interests of the company, rights holders, our Customers and other end users. Furthermore, this Open Internet Policy does not prohibit us from making reasonable efforts to address the transfer of unlawful content or unlawful transfers of content. For additional information, please review the Service Agreement and Privacy Policy.
